

A Letter from Our Founder

My name is Greg Wilkoff, Founder and President of Adept Networks. I've always had an entrepreneurial spirit and, as a technician, I love solving problems for my clients. I've worked in IT and telecom since 1995, gaining valuable skills in Seattle, Los Angeles and Portland while installing and maintaining systems in hospitals and other enterprises.

In 2002, I saw an opportunity to create the best company for my clients and my team. I started Adept Networks, which began as an IT and technology services provider in Southern Oregon, with a mission to be the most trustworthy, most caring and most knowledgeable.

I've worked diligently through the years to build up a reputation as a trusted and competent IT services company in order to provide peace of mind for our community. I believe in playing the long game by nurturing great relationships with my clients and my employees. I work to assemble the very best team of caring individuals I can find, making sure that every Adept Networks team member is laser-focused on serving our clients well and building up the company to be a solid and reliable shelter in a world of technical service uncertainty.

I've seen businesses suffer with IT companies that don't serve them as promised. My team and I have worked diligently and made serious investments in systems, solutions, people and process to provide your business with great service. For me, business success is measured by happy customers and happy employees. Everything else will fall into place if these are the mission of a company.

I've made them my mission. I'm committed to your productivity and success.

Sincerely,

Greg Wilkoff
Founder and President
